Mapping the Intersection of Keywords and Session Formats at the useR 2025 Program

This circular network plot visualizes the relationship between presentation formats and keywords from a conference. The largest category, **"Other"**, suggests a wide range of topics beyond standard formats. **"Virtual"** follows, reflecting the growing shift to online formats. **"Poster"**, **"Lightning"**, and **"Tutorial"** sessions each highlight different focuses—technical depth, brevity, and education respectively. Common keywords like "R", "Data," "Shiny," and "Visualization" appear across multiple formats, highlighting central themes.
